

# Optimize Efficiency and Profitability with Ryder's Powerful Warehouse Automation Solutions

Warehousing provides inventory control, improved workflow, quicker delivery turnarounds, long-term storage, risk mitigation, and supply chain optimization. Adding automation boosts operational efficiency, increases productivity, and reduces labor. At Ryder, we automate where it makes sense for your operation. We pilot and implement automation solutions that power superior warehouse performance.

## Collaborative Robots Maximize Flexibility

- AI-powered robots work safely beside human workers to perform repetitive manual tasks
- Increase lines per hour by 50% to 100%+
- Increase units per hour from 60% to 150%+
- Transfer seamlessly between locations
- Rental units add flexibility to scale at peak

## Goods-to-Person Boosts Productivity

- The AutoStore™ automated storage and retrieval system coordinates warehouse robots for 24/7 order fulfillment.
- Quadruple storage capacity with dense cubic layouts
- Increase pick velocity by 200%
- Robots bring work to humans
- Achieve 100% inventory accuracy

## Conveyor Automation Saves Money

- Quickly and efficiently transport loads within an area
- Increase productivity by 90%
- Boost order fulfillment by 60%
- Improve worker safety and satisfaction
- Create delighted customers

## Autonomous Forklifts Maximize Productivity

- AI delivers safe navigation without external infrastructure
- Reduce labor cost and turnover
- Improve inventory accuracy by 60-98%+
- Cut order fulfillment time by 40%
- Boost operational efficiency

Ryder makes choosing your best warehouse automation solution simple. From AI-connected robots to enhancements and traditional conveyors, Ryder is a leader in technology-driven supply chain solutions. Discover how Ryder's warehouse automation solutions can make you Ever better.
